The visitation estimates shown above include all visitors on tourism-related trips. Tourism related trips include: all leisure trips, trips that are a general visit to see friends or relatives, a wedding, a holiday visit, and business trips that are for a convention/conference/trade show or training/professional development.

2018 Regional Tourism Impact Estimates

Mid-Coast

In 2018, Mid-Coast visitors spent **\$655.5 million** ~ **down 6.8%** from 2017.

The **\$655.5 million** spent by visitors to the Mid-Coast supported a total of...

Economic impact begins when a visitor spends money in a region. But the benefits to a local economy go well beyond the impact of this initial spending. These "direct economic impact" dollars continue to circulate through the economy, as (for example) innkeepers pay wages, restaurateurs purchase raw ingredients, and so on. These additional rounds of spending are called "indirect economic impact." Total economic impact is the sum of the travelers' initial (direct) spending and the subsequent (indirect) spending by residents of the area. The jobs created, income earned, and tax dollars received are based on the total economic impact.
