# **2018 Regional Tourism Impact Estimates**

# Maine Woods Area

In 2018, Maine Woods visitors spent \$2.6 billion ~ up 12% from 2017.

The \$2.6 billion spent by visitors to the Maine Woods area supported a total of...

**Economic impact** begins when a visitor spends money in a region. But the benefits to a local economy go well beyond the impact of this initial spending. These "direct economic impact" dollars continue to circulate through the economy, as (for example) innkeepers pay wages, restauranteurs purchase raw ingredients, and so on. These additional rounds of spending are called "indirect economic impact." Total economic impact is the sum of the travelers' initial (direct) spending and the subsequent (indirect) spending by residents of the area. The jobs created, income earned, and tax dollars received are based on the total economic impact.

45,780 jobs

\$880 million in total earnings

\$245 million in total taxes

These economic impact estimates are based on all overnight visitors and out-of-state day visitors on tourism-related trips (as defined on the opposite page). Economic impact is estimated using DPA's visitor expenditure estimates and the RIMS II economic impact model.
